ObjectARX ObjectARX is a class library for writing customizations to AutoCAD which provides scripting-like programming of parts of AutoCAD. The goal of ObjectARX is to create a powerful object-oriented programming language for AutoCAD and to develop solutions to common problems that the user community faces on a daily basis. In 2011 Autodesk added ObjectARX as a plug-in language to AutoCAD. ObjectARX, which is initially known as ObjectARX-CAD, is based on ObjectARX, an ActiveX control based on C++. The new ObjectARX language allows users to write customizations that are similar to the Visual Basic scripts written by users of AutoCAD. It also challenges the United States' fundamental military strategy, which the Pentagon sees as "decoupled" from China's economy and development. As Army Gen. Martin Dempsey, chairman of the Joint Chiefs of Staff, argued in a recent speech, China is in "a completely different economic state than the United States." ADVERTISEMENT That analysis is correct, and it underlines the difficulty of defending U.S. interests in Asia and the growing vulnerabilities of U.S. forces there. It is also based on the faulty assumption that China has no vital interests, especially in the Pacific, and no interest in competing with the U.S. or any other powers for regional dominance.
