

[FULL VERSION]. TSReader is a very popular MPEG-2 transport stream analyzer. Used by thousands of people around the world, it allows inspection and recording of data . TP/TSReader is a free Gnutella client/server software that allows for transporting MPEG-2 TS streams over Gnutella networks. It supports all features found in the commercial TSReader software. Users can select the type of streams they would like to see, that is, video or audio. Alpha Layer is an easy-to-use MPEG-2 and Windows viewer that is designed specifically for the Windows CE platform. After that alpha layer runs in a new window. The Window is broken up into three tabs. Each tab contains information about a specific part of the MPEG-2 stream.
