China has been stepping up its efforts in Tibet where tens of thousands of security forces have been deployed since protests broke out in March. All but a few thousand of the Tibetan spiritual leader's followers have packed into the caves of their holy town, Gilou, for a public mass self-immolation in protest at the lack of dialogue with Beijing. Last week the spiritual and political leader held talks with the Dalai Lama after Beijing's insistence on introducing rules to control him and other exiled Tibetan leaders, something they have refused to do. A statement released after the meeting said the Dalai Lama had a "serious and constructive exchange of views". But other Tibetans do not believe that speech can give protesters the freedom they desire. "They are looking for a golden calf for their own illusion," said Tsultrim Gyamtso Rinpoche, an exile who had come to take part in the event. "A few of these will be martyrs, but the Tibetan struggle will go on." Despite his rejection of the Dalai Lama's party, she said, she hoped Tibetan spiritual leader would still lead the protests. "He has to lead the people," she said. According to analysts in Beijing, officials are so concerned about the large turnout of the Dalai Lama's followers in Gilou that they have dispatched police and soldiers from all over the neighbouring region, even Tibetan areas not known for Tibetan support, such as Qinghai. According to Han Chinese Web sites, a woman who "assisted the Dalai Lama and the Tibetan issue" with state affairs was murdered

What's new in Sokoban: Bunny Tales:

Sokoban: Bunny Tales, also known as Sokoban: Unhappy Easter Bunny, is a puzzle video game for the Nintendo Game Boy Color. It was released exclusively in Japan in 1996. The story revolves around the main character, Sokoban, who is able to play a piano-like instrument with his eyes. Gameplay Sokoban: Bunny Tales had no landscapes or goals. If the player was to collect all fifty hamburgers that he was able to find or eat without being shot, the game would be over, as all of the sprites and music would be removed from the game. Normally, players would collect money for every hour that the game was played and would also have to collect various types of fruits to be able to buy weapons at a later point in the game. The player would also be able to have rabbits follow around him, however, the player could also obtain more rabbits if he pressed the Start button at the bottom of the screen or Z button on the Game Boy. The game only takes up 22% of the GBC's screen, leaving a large empty space for the player to play in. Release The game is physically quite similar to a Tony Hawk's Pro Skater game. It is actually a port of a game titled Sokoban's Laughin' Labyrinth (ソコバン笑裕切球, Sokoban jouyū kirikyū?), which is a game of Sokoban that was released as a Japan-only cartridge for the Famicom. It originally came with a soundtrack of piano and riffs from the game. Later, the game featured spoken dialogue on the title screen and the introduction sequence. There were also items with names such as hamburgers, banana, martini and screwdriver. There are scattered references to animals in the game; in one part, Sokoban falls down a hole similar to a rabbit hole, and there are various rabbits and chickens throughout the game. References in other games In the DS game, Passage of Darkness, as a "hint", the game manual states, and the box art confirms, the original Sokoban was released by Pokémon. Sokoban is the Japanese word for being enslaved under a king/mayor/strongman type of rule. In the game Shufflepuck Lodge, at the beginning of the

game, the player can play Sokoban, which is shown
